
Ascorbic acid Coated 97% (Coated Vitamin C)

97 coated in vitamin C is vitamin C with a physical protective coating that prevents the active component of vitamin C from damage by detrimental factors. The integrity of the coat is good. It is suitable for vitamin C premixed feeds, complex pre-mixed feeds, mash and granulated porcine and avian feeds. This production is noted for slow release and has the same biological utilization rate as vitamin C.

Product Name	Ascorbic Acid Vitamin C Coated Feed Grade
Appearance	White to almost white solid granule
Loss on drying	≤2.00%
Residue on ignition	≤0.1%
Mesh size	100% through 40 Mesh,
As	≤0.001%
Pb	≤0.003%
Assay	≥97%
